CSMQP / PRODUCT BASELINE

User Stories

What learners, instructors and administrators need from the platform

This document describes the platform in everyday language: who it is for, what each person needs to do, and what a successful result looks like. It is intended to guide planning, design, building and review.

STUDENT	INSTRUCTOR	ADMINISTRATOR
Find study materials, take quizzes and understand progress.	Share learning materials, prepare questions and quizzes, and review class progress.	Keep accounts and shared content safe and appropriate.

How to read this document

Each item is a short need from one person’s point of view. The checklist below it explains what should happen for that need to be met. Small reference labels are included so the stories can be traced to the project’s requirements and review cases.

Version 1.0 | Product requirements baseline

1. Accounts and access

People need a clear, safe way to join the platform and reach only the areas meant for their role.

US-01 Create an account

F-001

As a student or instructor, I want to create an account so that I can use the learning platform.

What must be true

- I can register with a valid email address and password.
- An email address already in use is not accepted.
- If information is missing or invalid, I am told what needs fixing.

US-02 Sign in safely

F-002 / SR-001 / SR-002

As a registered user, I want to sign in with my email and password so that I can use my account.

What must be true

- Correct sign-in details let me into my account; incorrect details do not.
- My password is protected and is never saved in a readable form.
- My sign-in expires after a set time, and an expired or altered sign-in is refused.

US-03 See the right tools for my role

F-003 / SR-003

As a user, I want access to match my role so that other people cannot change my work or see areas they should not use.

What must be true

- Students, instructors and administrators have the access needed for their work.
- A person without permission cannot make a restricted change.
- A denied action leaves the original information unchanged.

2. Study materials

Instructors share course resources; students find and use the resources they need.

US-04 Share a study file

F-010 / F-011

As an instructor, I want to upload a study file so that students can use it while learning.

What must be true

- PDF, Word, PowerPoint and JPG files are accepted.
- A file larger than 15 MB is rejected with a clear message.
- An unsupported file is not added.

US-05 Organize study files

F-012

As an instructor, I want to label a study file with its subject and topic so that it is easier to find.

What must be true

- The subject and topic appear with the file after it is added.
- The labels remain available when the file is viewed later.

US-06 Find and download study files

F-013

As a student, I want to search for study files and download the ones I need.

What must be true

- I can search using a file name or a related word.
- The results match the words I searched for.
- I can download the matching file and open the correct file.

3. Question bank

Instructors prepare reusable questions that can be organized and selected for quizzes.

US-07 Add a question

F-020 / F-021

As an instructor, I want to add multiple-choice and true-or-false questions so that I can reuse them in quizzes.

What must be true

- A multiple-choice question has text, four choices and one correct choice.
- A true-or-false question has two choices and one correct answer.
- A saved question can be found again.

US-08 Organize questions

F-022

As an instructor, I want to label questions by subject, topic and difficulty so that I can find suitable questions later.

What must be true

- I can save these labels with each question.
- I can filter the question list using the labels.

US-09 Update or remove a question

F-023

As the instructor who added a question, I want to correct or remove it so that my question bank stays useful.

What must be true

- Changes are saved and shown when I view the question again.
- A removed question no longer appears as available.
- A question already used in a published quiz cannot be removed; I am told why.

4. Quizzes

Instructors prepare quizzes; students take them and receive prompt, useful feedback.

US-10 Build a quiz from questions F-030

As an instructor, I want to choose questions from my question bank to make a quiz.

What must be true

- The quiz contains the questions I selected.
- The quiz can be found again after I create it.

US-11 Set a time limit F-031

As an instructor, I want to set a time limit for a quiz so that students know how long they have.

What must be true

- The time limit is saved with the quiz.
- Students can see the remaining time while they work.

US-12 Publish a quiz F-032

As an instructor, I want to publish a quiz so that eligible students can take it.

What must be true

- A published quiz appears in students' available quiz list.
- A quiz that has not been published is not offered as available.

US-13 Take a timed quiz F-033

As a student, I want to answer a published quiz within its time limit so that I can complete the assessment.

What must be true

- I can open and answer an available published quiz.
- My remaining time is visible while I work.
- When time runs out, my answers are submitted automatically or a late submission is refused.

US-14 Receive an automatic score F-034

As a student, I want my quiz to be scored when I submit it so that I can see how I did without waiting.

What must be true

- The score equals the number of correct answers.
- An unanswered question does not count as correct.

US-15 Understand my quiz result F-035

As a student, I want to see my score and which answers were right or wrong so that I can learn from the result.

What must be true

- The final score is shown after submission.
- The result identifies which questions were answered correctly or incorrectly.

5. Progress and class insights

Students review their own progress; instructors look for patterns across a class.

US-16 Review personal progress F-040

As a student, I want to see my average score, recent quiz results and weaker subjects or topics so that I know what to study next.

What must be true

- The dashboard shows my average score and recent results.
- It points out subjects or topics where my results are weaker.
- The information agrees with my completed quizzes.

US-17 Review class performance F-041

As an instructor, I want to see class results so that I can understand where students are doing well or need help.

What must be true

- I can see class averages and question-level performance.
- Class totals and averages agree with students' quiz results.

US-18 See results in charts F-042

As a student or instructor, I want performance information shown in charts so that patterns are easy to understand.

What must be true

- Charts show performance information clearly.
- Charts continue to work for a class-sized set of results.

6. Administration and content safety

Administrators protect the community by managing accounts and responding to content concerns.

US-19 Manage user accounts F-050

As an administrator, I want to find and manage accounts so that I can respond to account problems.

What must be true

- I can view accounts and search by name, email address or role.
- I can block an account, restore a blocked account or delete an account.
- A blocked or deleted account loses access immediately and cannot sign in.
- I cannot block or delete my own administrator account or another administrator.

US-20 Report inappropriate content F-051

As a signed-in user, I want to report a study file or question with a reason so that an administrator can review it.

What must be true

- I can submit a report for a study file or question with a reason.
- I cannot create another open report for the same item while my earlier report is still open.

US-21 Review reported content F-051

As an administrator, I want to review reports and either remove the reported item or dismiss the report.

What must be true

- I can see reports that are waiting for review.
- Removing an item makes it unavailable throughout the platform.
- Dismissing a report closes it and keeps the item available.

7. Shared expectations

These expectations apply across the platform, not just to one screen or role.

US-22 Use the platform without long waits

NF-001 / NF-002

As a user, I want the platform to remain responsive during normal use so that I can complete my learning tasks.

What must be true

- The platform supports up to 500 people using it at the same time without major slowdowns.
- Under normal network conditions, at least 95 out of 100 page loads finish within two seconds.

US-23 Get quiz results promptly

NF-003

As a student, I want my submitted quiz to be scored quickly so that I can continue studying.

What must be true

- Under normal conditions, scoring finishes within one second.

US-24 Rely on the platform being available

NF-004

As a user, I want the platform to be available when I need it so that I can study or teach.

What must be true

- The platform is available at least 99.5% of each month, not counting planned maintenance.

US-25 Use the platform on common devices

NF-005

As a user, I want the pages to work on a computer, tablet or phone so that I can use the device I have.

What must be true

- The platform works on current versions of Chrome, Firefox, Safari and Edge.
- Pages adjust to desktop, tablet and mobile screen sizes.

US-26 Keep accounts and information safe

SR-004 / SR-005

As a user, I want my account and information protected so that other people cannot steal my sign-in or misuse my information.

What must be true

- Passwords and personal information are handled safely.
- Only people with the right access can view or change protected information.
- Information sent between the browser and the platform is encrypted.
- Unexpected text or code entered into forms cannot run as a script or change protected data.

US-27 Protect sign-in from repeated guesses

Sprint 2 security

As an account holder, I want sign-in attempts limited after repeated wrong passwords so that it is harder for someone to guess my password.

What must be true

- The first five failed sign-in attempts in a 15-minute period are rejected as incorrect credentials.
- The sixth attempt and later attempts during that period are temporarily blocked.
- Attempts from another person’s address do not trigger my lockout.

8. Scope boundaries

What this first release does not include

- Connecting to an external university learning system is outside this release.
- The platform does not collect or store payment or other financial information.
- Requirements not stated in the stories or shared expectations should be agreed with project stakeholders before work begins.

Reference key

The small labels beside each story point to the matching project requirement IDs (F, NF and SR) and support review and testing traceability. The story text and completion checks remain the plain-English source of user needs.
